# BUNCHING ONION

## FRAGRANT F1

0.60 g /200 pcs.

Plants are vigorous, very prolific, fast-growing, well-branched, and easy to grow in warm or hot weather. (120 DAS)

## CABBAGE

### SUMMER SUMMIT F1

0.25 g / 40 pcs.

Plants are medium. Heads are elliptical, solid, and uniform, about 2 kg, with tender texture and good quality. This hybrid is suitable for growing in warm weather. (50 DAT)

### VOLCANO F1

0.25 g / 40 pcs.

The head of this variety is semi-round shape, firm head with a short core. Gray-green in color. Has excellent heat and rain tolerance. The average head is approximately 1.5–2.0 kg. (60-70 DAT)

## CARROTS

### MARCHEW

2 g / 300 pcs.

This variety has a long conical shape and is deep orange in color. Chosen by growers for its disease resistance and bright color. (90-110 DAS)

## CARROTS

### SIGMA F1

0.75 g / 150 pcs.

A cylindrical root with smooth skin and attractive orange color. This plant is vigorous and easy to grow, growing about 20–22 cm in length and 4.5–5.5 cm in diameter. Average weight is 200-250 g. (110 DAS)

## CAULIFLOWER

### FARMERS EXTRA EARLY F1

0.40 g / 50 pcs.

This is a tropical cauliflower that is resistant to hot weather. Heads are compact, about 0.6 kg, with yellowish-white curds and green stalks. Good quality. (40-50 DAT)

### SNOW BALL F1

0.30 g / 35 pcs.

A variety that has a crisp, tender, and compact whitehead about 600 grams, and is heat tolerant. Resistant to Downy Mildew. (37 DAT)

## COWPEA

### MABUNYI

8 g / 50 pcs.

A legume that has a high-quality plant protein source. Dark green in color when mature. This bean grows up to 17 cm, and its average weight is 4.0–6.0 g. Tolerant to shade and drought conditions. (49 DAS)

## CHINESE KALE

### KAI-LAN

6 g / 500 pcs.

The plant is about 30 cm long and has crispy dark green leaves. Its stem length is about 11 to 14 cm and exhibits vigorous growth. Rich in vitamins A, C, and K. (45 DAS)

## CORIANDER

### FAVOR F1

3 g / 30 pcs.

This variety is known as a spice and medicinal herb. It has feathery leaves and a fabulous aroma. The approximate weight is 50 g. (40-55 DAS)

## CORN

### LAGKITAN

Glutinous Corn

20 g / 60 pcs.

A popular early and high-yielding OP variety for fresh ear and grain markets. Widely adaptable and recommended for year-round cultivation. (60-65 DAS)

### PURPLE GEM F1

Glutinous Corn

1.5 g / 9 pcs.

A hybrid variety that produces large ears with sweet and tender purple kernels. Ideal in the dry season. Lowland. (70-75 DAS)

### FOUNTAIN F1

0.30 g / 7 pcs.

A petite burpless cucumber, the fruit is light green with vestigial spines. Very vigorous and thrives well in hot and humid areas. (40-50 DAS)

## BUNCHING ONION

### VICTORY F1

0.50 g / 200 pcs.

This variety is compact and has pointed, thick leaves with a dark green color. It has a long shelf life and is adaptable to different weather conditions. (90 DAT)

## CUCUMBER

### THUMB SWEET F1

0.20 g / 6 pcs.

This variety is thin-skinned and has excellent flavor. About 2.5 to 12.5 centimeters in length, often with bumpy skin. Typically used for pickling. (30 DAS)

### VANTAGE F1

0.25 g / 6 pcs.

A hybrid cultivar producing medium to large sized fruit 9–10 inches long. The rind is green and smooth with small white spines early. Good for storage and shipping. (45-50 DAS)

# EGGPLANT

## CHARMING F1

0.25 g /55 pcs.

This variety is short and chubby with an attractive appearance and luster, and has tender white flesh. Plants are very well-branched, medium-early, and quite prolific, with 2-3 purple flowers bearing fruits on one node. Great for *Torta*. (75 DAS)

## FULLNESS F1

0.20 g/25 pcs.

This variety meets the needs of those markets and consumers who like round eggplants. The fruit has a silky-smooth and uniform appearance with an almost black color, pale green flesh, and violet calyx and blossom. (70 DAS)

## FOND MAY F1

0.20g /30 pcs.

This variety has white and tender flesh, 30-35 cm long and 4 cm wide. Both the fruits and calyx are in a very dusky shade of purple with rich gloss. (77 DAS)

# FRENCH BEANS

## FORTUNER F1

0.15 g /35 pcs.

A compact and vigorous plant. High-yielding variety, superior-quality fruits of around 26-30 cm long with a green calyx and long shelf life. (55-60 DAT)

## MERCI

4 g /12 pcs.

A variety with round, sweet, and tender pods. The plant is a bush type and adaptable for all seasons; highland. (45 DAS)

# GOA BEANS

## WINGED BEANS

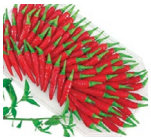

6 g /15 pcs.

*Sigarilias*. Plants have vigorous vines and short and broad leaves. Grows well in lowland. (70-72 DAS)

# HOT PEPPER

## ASCENT F1

0.10 g /20 pcs.

The plant is early, semi-spreading, upward, with strong branching, and very good fruit setting. Fruit is thin, firm, uniform, and extremely pungent. Fruits are on top of the canopy for easy harvest. (100 DAS)

## CLEOPATRA F1

0.08 g /15 pcs.

Plants are spreading, well-branched with short internodes, and prolific, with about 200 fruits per plant. Fruit is uniform and smooth, with bluish-green skin when young, turning red at maturity. Very pungent. Resistant to viruses. (75-85 DAS)

## DJANGO F1

0.08 g /15 pcs.

All year round variety, highly productive, light to medium green, '*Sinigang*' type hybrid hot pepper. (40-45 DAT)

## KY SINIGANG F1

0.08 g /10 pcs.

A slim and long *Panigang*-type pepper with a medium tall, slightly spreading growth habit. Aromatic with a light subtle spiciness. (80 DAT)

## PANIGANG BEST F1

0.10 g /15 pcs.

A very prolific hybrid variety that produces slightly pungent fruits. Glossy and light green to red when ripe. All-season; lowland. (50-55 DAT)

## PINATUBO F1

0.10 g /15 pcs.

A hybrid variety that produces long, heavy, and very pungent fruits. Stress-tolerant variety, especially during the rainy season. All-season; lowland. (75-80 DAT)

# OKRA

## RED HOT F1

0.10 g /22 pcs.

A highly pungent, very productive, market-preferred upright hybrid hot pepper. Dark green to bright red in color, tolerant to diseases. (70-75 DAT)

## GREENIE F1

0.50 g /8 pcs.

The fruit is plump, dark green, and five-ridged with good quality. The plant is early and vigorous with small, parted leaves. Popularly known as Japanese Okra. For export market. (50 DAS)

## PETER PAN F1

0.50 g /7 pcs.

A hybrid variety of okra that is crisp with a slightly sweet taste. Deep green in color and has no spines. Great as snack food, blanched and chilled. (48-52 DAS)

# LETTUCE

## ARUGULA

1 g /200 pcs.

Leaves have a nutty pepper flavor, have longer leaves, and are known as a leaf-type lettuce. (22-25 DAS)

## DAZZLING

0.5 g /230 pcs.

Leaf-type lettuce that is easy to grow and good for salad. Head weight averages 300g with proper care. (38 DAS)

## GENERAL

0.70 g /300 pcs.

Iceberg lettuce. Medium to large size, averaging 25-30 centimeters in diameter, and spherical in shape. The firm head is tightly packed with broad, thick, and crisp leaves. This variety is heat tolerant (55 DAS)

## GRAND RAPIDS LG

1 g /500 pcs.

Leaf-type lettuce. Medium to large size upright with light green leaves. The mild and flavorful leaves are frilled and crisp. Can be grown in both highland and lowland and heat tolerant. (55-60 DAS)

## GRAND ROMAINE

0.50 g /200 pcs.

This butterhead-type variety is crisp and crunchy and usually has a mild or just slightly bitter taste. A cool-season vegetable that will bolt in hot weather. (45 DAS)

## MINI LOLLO ROSSO

0.10 g /80 pcs.

Forms a petite and distinct compact rosette of fan-shaped blood violet color leaves with a non-hearing pale green base. The flavor is bold, slightly bitter, earthy, and nutty. (35 DAS)

# MUSTARD

## OLGA RED

0.50 g /250 pcs.

Leaf-type lettuce that is very good for salad. The unusual leaf texture is sweeter and more crunchy. Dark red leaves form a loose head with excellent flavor. Heat-tolerant but does better in cool weather. (35-45 DAS)

## SINOPE RZ F1

0.20 g /600 pcs.

A normal wild rocket-type with uniform, well-incised leaves and slow bolting. Good against red stress that can occur in cold or very hot conditions. It is suitable for both open-field and indoor production. (25-28 DAS)

## BAUSIN F1

1 g /425 pcs.

Head-type variety that is typically quite pungent. Mild, sweet taste and has bright golden-green glossy leaves with a hint of red in the veins. Popularly known as Chinese Mustard. (75 DAS)

# PAI-TSAI

## CHING CHIANG

2 g /500 pcs.

This variety is early, sturdy, and semi-dwarf. Tolerant to heat, cold, and dampness. Smooth leaves with thick petals, nice flavor, tender and fine texture. (45 DAS)

# PECHAY

## PAVITO

8g /1500 pcs.

A compact, short, fast-growing pechay with very dark green leaves and pure white, crispy stem. All year-round variety. (25-30 DAS)

## PAVO

8 g /1500 pcs.

A fast-growing variety with short and compact plant types. Leaves are dark green with thick and bright white stem. All year-round variety. (25-30 DAS)

# OKRA

## SPLENDOR F1

0.50 g /7 pcs.

This attractive looking red okra is ridged-type with high adaptability to temperature. Good fruit set ranging from 9.0 cm x 1.9 cm and a weight of about 13 g. (46-50 DAS)

# RADISH

## MAKINIS

10 g /350 pcs.

A vigorous all-year-round variety with long, smooth, heavy, and cylindrical roots. (45-50 DAS)

## MING-HO F1

0.20 g /12 pcs.

Flesh is white, tender, and has a mild flavor. The plants are early and vigorous and not recommended for growing under cool conditions. (45 DAS)

# SITAO

## GREEN POD KAOHSIUNG F1

3 g /20 pcs.

This is a heat and wet tolerant yard long bean that produces enormous crops of long, slender, round, green pods that are delicious, sweet, tender, and of fine quality. (55 DAS)

## KY BUSH F1

3 g/20 pcs.

Plants are very vigorous, dwarf, around 50 cm tall, and well-branched. Pods are slender, stringless, approximately 25–30 cm long, and light green in color. Early and resistant to viruses. (50 DAS)

## MAKISIG

5 g /25 pcs.

All year-round variety. It has smooth, dark green pods with good shelf life. Good plant vigor and intermediate resistance to cowpea mosaic virus. (45-50 DAS)

## SNAP BEANS

### SUMILANG

5 g /20 pcs.

Bush-type variety. A very prolific variety that produces green pods. Adaptable to dry season; lowland. (45-50 DAS)

### LUNTIAN

6 g /15 pcs.

An early maturing variety that produces semi-round green pods with a long and productive life. A pole-type variety and adaptable in warm areas. (40-45 DAS)

## SPINACH

### GREEN GIANT F1

1 g /60 pcs.

Plant is erect with many leaves, early, easy to sow, fast-growing, and high-yielding. Leaf is light green, with few serrations and long petioles. Bolting may occur earlier in the spring crop. (35 DAS)

## MUSTARD

### MAGITING

10 g /2000 pcs.

An early maturing variety that produces broad, straight, and flat leaves. Adaptable in lowland and highland. (30-35 DAS)

## SPONGE GOURD

### SAGANA

3 g /18 pcs.

Pointed, ridge-type, and green in color. The average weight is 250g per fruit. Adaptable to lowland. (45-58 DAS)

### SMOOTH PATOLA

3 g /25 pcs.

A vigorous plant, smooth, cylindrical, and dark green in color. The average weight is 360 g per fruit. Tolerant to downy mildew. (70 DAS)

## SQUASH

### FAIRY F1

10 g /30 pcs.

A highly prolific variety. The fruit is oval-shaped, with orange-yellow smooth skin and golden yellow thick flesh, weighing about 1.0-1.5 kg. Excellent for storage. Heat tolerant. (100 DAS)

### PHOENIX F1

10 g /65 pcs.

This hybrid winter squash is papaya shaped. It is good for close planting and easy to harvest since it has very few lateral shoots. The flesh is thick, golden-yellow, and has exceptional flavor and sweetness. Has good fruit quality. (110 DAS)

### SUPREMA F1

10 g /50 pcs.

A high-yielding variety that produces high-quality fruits. Has a big, flat round shape and maligat flesh. Tolerant to viruses and fungal diseases. (80-95 DAT)

## SWEET PEPPER

### SULTAN F1

0.09 g /8 pcs.

A high-yielding conical sweet pepper. It has firm fruits, smooth, thick, and light green to red in color. Has a long shelf life. (55-60 DAT)

### TINKER BELL

0.50 g /90 pcs.

A compact and prolific variety that has good-quality conical wax peppers. Adaptable to lowlands and highland. (60 DAT)

## SOYBEAN

### RYOKKO

6 g /12 pcs.

The plant grows vigorously, 80 to 100 cm tall, and produces a large, deep green and white-haired pod. This variety is good for processing and for fresh markets. (65-70 DAS)

# TOMATO

## DIAMANTE MAX F1

0.05 g /15 pcs.

Determinate variety, round, and firm with excellent transportability and storability. High-yielding and tolerant to heat. (60-65 DAT)

## KINGKONG #2 F1

0.06 g /15 pcs.

Plants are indeterminate and resistant to viruses and bacterial wilt. The fruit is round and firm with green shoulders, turning red at maturity. Resists cracking. (100 DAS)

## SEASON RED F1

Cherry Tomato

0.04 g /10 pcs.

Heat and humidity-tolerant tomato that sets abundant small fruits. Plants are determinate, vigorous dwarf, and can grow with minimum care. (65 DAS)

# HONEYDEW

## BRILLIANT F1

10 g /180 pcs.

Oblong shape with bright yellow, smooth skin, and cream color flesh. Has a sugar content of 12-15% and an average weight of 1.5-2.0 kg. (60-65 DAS)

## ILOCOS GOLD F1

10 g /180 pcs.

This variety produces small, oval-shaped fruits with white flesh. Brix averages 12-15% with weight ranging from 600 g to 1 kg. (60-65 DAS)

## JADE LADY F1

10 g /180 pcs.

This variety produces oblong fruits with light green flesh. Brix averages 10-15%, with weight ranging from 1kg to 2kg requiring proper care. (60-65 DAS)

# MELON

## CAMILLE F1

Hami Melon

10 g /160 pcs.

Hami melons are oblong and have netted yellow skins with dark green streaks. They have crisp, juicy, sweet pale apricot-colored flesh, and a large seed cavity. About 6-9 pounds. (70-75 DAS)

## SWEETIE GIRL F1

Muskmelon

10 g /150 pcs.

Fruit is oblong in shape with a golden yellow rind. Weight averages up to 2-4 kg with a sugar content measured as high as 10-12%. (60-70 DAS)

## SWEET FLAVOR F1

Muskmelon

10 g /150 pcs.

Small, globe-shaped fruits with buff-yellow netting and easily ripens to a light orange color. (60-65 DAS)

# WATERMELON

## BIGATIN F1

50 g /900 pcs.  
10 g /160 pcs.

Round fruit with red flesh that is sweet and crunchy. Has good fruit setting and vigor. Average weight 10-12 kg. (75-85 DAS)

## DIANA F1

10 g /180 pcs.

Oblong-shaped watermelon with red flesh that is juicy and crispy. Golden yellow skin. (70-75 DAS)

## DRAGON F1

0.50 g /11 pcs.  
10 g /190 pcs.

Globe-shaped, red-fleshed fruits with a light green rind and slender stripes. Brix average 14%, with weight ranging from 6 kg to 10 kg. (60-80 DAS)

# WATERMELON

## GOLDEN BOY F1

0.50 g /15 pcs.  
50 g /1200 pcs.

Oblong-shaped and yellow flesh. (75-80 DAS)

# MICROGREENS

## RED AZTEC F1

Amaranth

0.50 g /500 pcs.

Intense red color, great for mixed salad packs and baby leaf mixes. An improved Red Amaranth variety. (7-14 DAS)

## PARSLEY ITALIAN GIANT F1

0.60 g /300 pcs.

Parsley microgreens are excellent for flavor. Great as a garnish or other application where a parsley flavor would contribute. (7-10 DAS)

## MICRO BROCCOLI GREEN F1

2 g /230 pcs.

Contains high levels of vitamin C and nutrients for an immune system boost. Has bright green leaves, white/pale green stems, and a sweet and mild flavor. (7-14 DAS)

## RED CARPET F1

Mustard

0.60 g /350 pcs.

This variety will bring a spicy punch to your wraps, sandwiches, and salads. These peppery little shoots are topped with dark purple foliage and packed with a pungent mustard flavor. (7-14 DAS)

## DAIKON F1

Radish

1.50 g /70 pcs.

Daikon is low in calories yet high in many nutrients, particularly vitamin C and folate, a long white root vegetable known for its mild, spicy, earthy flavor. Can be grown to maturity as radish. (7-10 DAS)

## RIOJA IMPROVED F1

Radish

1.50 g /150 pcs.

Distinctive dark red cotyledons. Rich in vitamins and minerals, suitable for sprouts and microgreens. Sprouted seeds can add valuable nutrients to your diet. (7-10 DAS)

# HERBS

## SANGRIA F1

Radish

2 g /160 pcs.

Colorful shoots with a peppery hot taste. Delicious in salads and sandwiches. Grows all year round. (7-10 DAS))

## MIZUNA CN F1

1 g /400 pcs.

Fast-growing Mizuna with fancy, toothed leaves. Unique, mild-flavored mustard green. (7-14 DAS)

## BASIL F1

70 pcs.

Basil is easy to grow in warm, sunny conditions. Perennial-type. Basil grows upright in bushy clumps 15 to 30 inches tall and wide, depending on the variety.

# HERBS

## CHAMOMILE F1

300 pcs.

Chamomile flowers are used to make tea. Chamomile tea has a fresh, clean flavor that is immediately soothing. It prefers to grow in full sun but will tolerate partial shade.

## CHIVES F1

150 pcs.

Chives are a hardy cool-weather perennial, a relative of the onion. The tips of chive leaves have a mild onion flavor. Chives have slender, round, hollow grass-like leaves 6 to 10 inches long.

## DILL

0.30 g /80 pcs.

Aromatic fern-like leaves. (45 DAS)

## ITALIAN PARSLEY

0.30 g /40 pcs.

Curly leaf variety. (45 DAS)

## HYSSOP F1

150 pcs.

This herb is a pretty compact semi-evergreen perennial with spikes of blue and violet flowers. Hyssop is a shrubby and sprawling evergreen plant that grows 18 to 24 inches tall and about 12 inches wide.

## LAVENDER F1

40 pcs.

Lavender is a perennial woody shrub that grows 24 to 30 inches tall and wide. Lavender is resistant to both heat and cold; it does not grow well in humid, hot climates. (45 DAS)

# HERBS

## LEMON BALM F1

150 pcs.

A herbaceous upright perennial that can grow from 12 to 24 inches tall. Best in cool weather. Plant lemon balm in full sun. It has a lemon scent, oval, toothed leaves that are heavily veined or quilted from 2 to 3 inches long and arranged opposite one another on four-sided stems.

## LEMON BASIL F1

150 pcs.

Leaves are small to medium in size; the leaves are smooth, flat, and green, containing some veining across the surface with lightly serrated edges. Has a crisp and succulent consistency with a sweet, citrus-forward aroma. Lemon basil is available year-round, with a peak season in the summer.

## OREGANO F1

200 pcs.

This is an aggressive plant that likes to spread and can grow quite large if you allow it. The stems can also grow up to 2 feet high in full sun and well-drained soil and will also do well in partial shade.

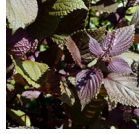

## PEPPERMINT F1

70 pcs.

This plant can grow up to three feet tall and two feet wide at maturity, depending on growing conditions. The stems are usually red and smooth, though some cultivars have green, hairy stems, and the leaves are broad and oval with toothed margins and may be hairy.

## PERILLA F1

40 pcs.

An erect, annual, freely branching, herbal, medicinal, aromatic, functional ornamental perennial plant that grows about 60–90 centimeters tall.

## WATERCRESS F1

300 pcs.

A perennial cultivated for its clean, slightly pepper tasting leaves and stems. Seen wild, it grows partially submerged in running water and flooded areas in moderately cool climates. Prior to planting, choose a sunny location. Seeds are tiny, so they need to be lightly broadcast on soil.

## SAGE F1

60 pcs.

A green leafy herb with a bushy growing habit. Its long stems reach over half a meter tall. It has a greyish-green color, fuzzy texture, and silvery bloom. Young leaves may have a purple tint. Sage is an excellent source of vitamin K and a source of fiber, calcium, iron, and manganese. Grows all year round.

## SPEARMINT F1

200 pcs.

Good source of vitamins, antioxidants, and vital nutrients. Its aroma is very similar to peppermint. It contains less menthol. It has a sweeter taste than peppermint. The leaves are around 5 centimeters to 9 centimeters long and 1.5 centimeters to 3 centimeters wide. The tips of the leaves are pointed, like spears.
